

Managing the Test Process with QaTraq Professional

QaTraq provides the foundation for test teams to create and update test scripts, test cases and test results. QaTraq Pro provides you with instant access to graphical reports, test script templating and other key functions. This all improves visibility of your testing and helps pin-point test case execution progress.

Introduction

As a key player in the test management and software testing arena, Traq Software provides training and education for users of our leading test management applications QaTraq (open source) and QaTraq Professional. We apply our in-depth experience and best practice know-how to provide clear, concise training to help your team get the most out of QaTraq Professional.

Traq Software training courses are available for as little as \$41 per candidate per hour, a small price to pay for knowing that your team is working as effectively as possible and getting maximum benefit from our software.

Training Environment

The use of online, web based, training facilities enables us to deliver courses directly to your team at your convenience. With no requirement to travel to training facilities we are able to provide very competitive course prices and save you the expense of sending your staff off site for days at a time. Yet even with these cost and convenience benefits you are provided with live dedicated trainers who can engage your staff in a way that no automated computer based training program can. In short online training provides us with a simple way to deliver our training material and provides you with the simplicity of in-house, desk based training sessions, with a live trainer.

The unique benefits you take away from our courses:

- Relevant business examples and case studies drawn from real organisations.
- A handy summary of the key learning points from the course.
- Further off line practice material and examples.
- Post course support for all delegates.

Our Trainers

Our experienced trainers give you the information you need to make QaTraq Professional really fit your business requirements. Utilising the advantages of live online web based training sessions our trainers provide a cost effective solution to help you get the most out of your QaTraq Professional deployments.

Training Structure

All our courses are split into distinct 2 hour sessions. For example our Introduction to QaTraq Professional course is split into 5 x 2 hour sessions delivered over a 5 day period. Our experience has shown that these frequent short sessions are instrumental in disseminating large amounts of information quickly and effectively.

Training Support

To enable your team to familiarise themselves with QaTraq Professional we provide, on one of our centrally managed servers, an on line training instance of QaTraq Professional. This training instance of QaTraq Professional is made available to your team, free of charge, at the start of the course and remains available for 30 days after the last training session. This provides an ideal environment for your team to experiment with their new found knowledge.

Availability and Pricing

All our online training sessions have a maximum of 6 attendees and include course notes along with post course support. By keeping our courses to a maximum of 6 people we are able to work with questions and queries on a one-to-one basis as necessary. By delivering our courses live, via the web, we provide some of the most competitively priced training courses available today. Please contact us for details on specific course prices and course availability; email: training@traqsoftware.co.uk or call: +44 (0) 1494 582037

Public Courses

We run regular public courses which anybody with an interest in QaTraq Professional can attend and benefit from. Whilst anybody can join these public courses we still limit attendance to just 6 people to ensure each individual gets the most out of our courses. Please contact us for a list of up and coming dates for our public courses.

Private and Tailored Courses

If you require extra privacy, we can provide training for your team alone. Customised courses are also possible where we work closely with you to develop a bespoke training program that meets your specific business objectives.

Available Courses

We currently provide 3 course levels for QaTraq; Introduction, Intermediate and Advanced. Both the Introduction and Intermediate courses are available to QaTraq (Open Source) and QaTraq Professional users. The Advanced course covers many aspects of QaTraq Professional and is therefore only relevant to QaTraq Professional users. For full details of course contents please contact us for details; email: training@traqsoftware.co.uk or call: +44 (0) 1494 582037

Introduction: This course is designed for those who wish to gain a proficient understanding of QaTraq. The course focuses on the four key aspects of any test project; managing, co-ordinating, developing and executing tests. The course will help you develop a structured approach to your testing and give you a basic understanding of using QaTraq. We will help you become proficient in the common day to day tasks encountered whilst using QaTraq or QaTraq Professional.

Intermediate: This course is designed for those who have already been using QaTraq and who wish to take their knowledge to the next level. This course focuses on the development of test scripts, test cases and the tracking of test results. The course also covers version control principals and examines the reporting capabilities of QaTraq and QaTraq Professional.

Advanced: This course is designed for those who have already used QaTraq Professional extensively and who now need to understand some of the more advanced features and capabilities of QaTraq Professional. This course focuses on Templates, Sets and the Export/Import capabilities of QaTraq Professional. This course also looks at; how regression testing can be approached, how test script review processes can be setup and how QaTraq Professional can be used to track and estimate time taken to complete tests.
